

Climate Change

Establishing an Open Government stakeholder network to increase participation and engagement in the implementation of key climate change policies

What we're doing

- The Climate Change Policy Engagement Network was launched in 2023. The online network aims to bring in more organisations to ensure a wider range of views, expertise and voices are heard across areas of climate, equality and inclusion, policy participation and community engagement.
- Ongoing development of the stakeholder network to improve its function to help deliver meaningful opportunities for engagement and participation across key climate policy milestones. These include:
 - Scotland's Just Transition plans
 - Climate Change plan
- To find out more or to get in touch around becoming a member email climatechangeengagement@gov.scot
